EXPERIENCE

Software Developer Engineer Intern

Jan 2026 – Present

SuperAGI

Bengaluru, India

- Shipped a full-stack **Workflow Analytics** dashboard using **Next.js 15**, **React 19**, **TypeScript**, and **Ant Design** in a **Turborepo** monorepo, surfacing **\$794K+** pipeline across **466+** deals with composable charts and date-range filters.
- Architected a **3-iteration** node-based Custom Events builder with **Vue.js**, **TypeScript**, and **ReactFlow**, enabling drag-and-drop trigger configuration and variable injection integrated with backend **gRPC** services.
- Built **Call Intelligence** real-time UI on **LiveKit WebRTC** and **OpenSearch**, and shipped a **LinkedIn** multi-channel integration using **Next.js SSR** with **feature-flag-controlled** rollout.
- Resolved **15+** production defects across a **React 19**, **TipTap**, and **Yjs CRDT** collaborative editing stack — debugging filter race conditions and persistence bugs using **Sentry** and **OpenTelemetry** traces.

PROJECTS

MusicSaaS: AI-Powered Music Generation Platform | *Next.js, TypeScript, Inngest, Prisma*

[Source Code](#) | [Demo](#)

- Designed a **full-stack, server-side rendered** music generation SaaS platform using **Next.js 15** and **React 19** achieving a Lighthouse **performance score of 95** and improving initial page load times by **30%**.
- Architected a robust backend integrating **Better Auth** for secure authentication, **Polar API** for subscription-based payments, and **AWS S3** for scalable audio file storage and delivery.
- Constructed a resilient, **asynchronous music generation** workflow using **Inngest** to manage background jobs, reducing audio processing latency to under 30 seconds through **Modal AI API integration**.

Finlit: Financial Literacy Platform | *React, Tailwind CSS, Framer Motions, Python, Express.js*

[Source Code](#) | [Demo](#)

- Created a responsive financial literacy platform with **20+ reusable components**, enhancing user interaction by achieving a **90+ Lighthouse score**.
- Pioneered a **Python-based anomaly detection** system using machine learning to identify and flag **25+** potentially **fraudulent transactions** in the initial phases.
- Integrated **Clerk** for secure and seamless user authentication and engineered smooth animations using **Framer Motion**.

P2I: Real-time Conversational E-commerce Insights | *Next.js, Typescript, Python, LangChain*

[Source Code](#)

- Crafted **multi-tool agentic architecture** with Master Router Agent using NLP for intelligent **intent classification** and task delegation across 4+ specialized AI tools.
- Assembled **RAG pipeline** using LangChain, ChromaDB vector store, and Cohere re-ranker to optimize context relevance for deep analytical insights.
- Delivered **AI Product Discoverer tool** using Gemini 2.5 Flash with function calling, reducing data acquisition failures by **50%** and eliminating scraper maintenance overhead.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, C++

Frontend: React, Next.js, Vue.js, TypeScript, Tailwind CSS, Ant Design, ShadCN, ReactFlow, TanStack Query

Backend & AI: Python, FastAPI, Django, DRF, Node.js, Express.js, LangChain, RAG, Gemini, gRPC, REST APIs

Databases & Cloud: PostgreSQL, MongoDB, Redis, MySQL, OpenSearch, ChromaDB, Prisma, AWS

DevOps & Tools: Docker, Turborepo, Git, Sentry, OpenTelemetry, Postman, Figma, Vite

EDUCATION

CHRIST (Deemed to be University)

Bangalore, Karnataka

Master of Computer Applications

July 2024 – Present

Manipal University Jaipur

Jaipur, Rajasthan

Bachelor of Computer Applications, 9.32 CGPA

October 2021 – June 2024

ACHIEVEMENTS

Achieved **Dean's List** recognition throughout **undergraduate** program for maintaining top **academic performance**.

Selected for the second round of **Tata Imagination Challenge 2024**, a competitive national-level event.
